

Group 36 - Financial time series predictions using recurrent neural networks

Review 1:

- o Feasibility (Potential problems, is the project possible?) : 1
- o Dataset, Approach, Metrics & evaluation : 3 [1, 1, 1]
- o Motivation & Research question: 1.25 [3]
- o Timeline: 1
- o Background literature: 0.5 [2]

- + The idea is good.
- I cannot find references inside the text.
- No literature part
- Research question is so general. Maybe you could divide it into sub-questions.

? You said“..reuse the resulting model for other time series predictions such as weather forecasting...”. How will you reuse those models?

Review 2:

Criterion	Maximum grade	Obtained grade	Comments
Feasibility	1	0.85	
Dataset, Approach, Metrics & evaluation	3	2.1	motivate the choices taken
Motivation & Research question	3	2.2	research question can be better motivated.
Timeline	1	0.85	
Background literature	2	1.2	Relevance of literature not presented.
Total	10	7.2	

Review 3:

This a feasible project with clear statement of what they want to do. The suggestion is to think about the evaluation and your research question. Also, you may read more related literature to have a sense of what other people have done in this topic.
